

# The Raymond Recorder

The News and Advertising Medium of Southern Alberta's Sugar District

VOL. 4

RAYMOND, ALBERTA, FRIDAY, APR. 9 1926

NO. 6

## News Notes

A very important thing going on now is spring clothes.

Why is it the moth seldom makes the mistake of eating a patch?

Wouldn't it be nice if we were as nice as we wish our friends were.

Another sign of spring is when the small boy hides the rake and carpet beater.

New roofing, costing nearly \$700 will be put on the Opera House in the near future.

E. E. Peterson returned home Tuesday from a visit to Montana.

Fred Romeril returned last Sunday from a short term mission to Virginia.

Today is cleanup day and the town council requests all citizens to clean up their yards and premises.

A horse will pull your car out of a ditch. And very often horse sense will pull you out.

J. Shimbaske, Japanese farmer, returned this week from Japan and will farm on John Heninger's place at Welling.

George W. Green, general manager of the Ellison Milling Company, who has been wintering in Florida, has returned. Mr. Green who is much improved in health, has been doing special church work for the L. D. S. faith in the city of Muma, centre of the great Mormon boom.

### YES! HE DID!

A lady was shocked at the language used by two men repairing a telegraph line near her house she wrote the company about it and the foreman made this report: Bill and I were on that job and I was up on the pole and I let the hot lead fall and it went down Bill's neck, then he said "Harry you must be more careful."

## For Sale

- 1 Large roll top desk.
  - 1 Large heater.
  - 1 Small heater.
  - 1 Four jet oil range with oven.
  - 1 DeLaval cream separator.
  - 1 Maytag electric washing machine.
  - 1 Auto knitting machine.
  - 1 Wall clock.
  - 1 Electric cooker.
- Reasonable Prices  
—Don Rodeback, Raymond.

LOST—A 21 jewel American Waltham watch, also fob with the picture of a Runley tractor on it. Lost in the vicinity of the Liberty elevator. Suitable reward to finder—return to Recorder office.

## Against Saturday Night Amusements

President E. J. Wood, of the Alberta Stake, speaking at Cardston recently said:

"No good will ever be done your child by the parents criticizing unfavorably the officers of the law."

Because parents allow the child to break lesser laws with impunity, such as the ourfew law, they grow up with a disrespect for all law."

"Failure to hold family prayer is the secret of many family troubles."

The union which comes from the family on bended knee, asking for God's blessing upon each and all is a safeguard against disagreement and disunion in the home."

The Mormon Church is against all Saturday night amusements.

The Dance Hall is the foundation of and a step toward most of our social evils. Encourage the drama, the concert, the home evening programs. While the Church does not condemn the good dance, as dancing is a pleasant exercise, yet it absolutely forbids the Saturday night dances, and discourages all Saturday night amusements."

Pay your obligations. Seed-time is here. It is God's providence which causes germination and gives the increase. No man can be fair to God and deal unjustly with his fellow man. If you cannot pay all your debts pay part of each, and meet your creditors openly and arrange for further settlements. Pay your debts.

Observe the Sabbath day. To allow your children to play ball on Sunday or to indulge them in other Sunday games is to tell them, in effect, that you do not believe in the things you teach, and is the first cause for your children breaking the other laws of the land. Sabbath breaking strikes at the root of the moral and religious life of this nation. The Sabbath-break

The Merc. is offering in addition to Wednesday morning grocery specials a beautiful 21 piece tea set, hand painted china for \$2.49. See window display.

NOVELTY DANCE—Saturday, April 17. Watch for posters and next week's announcement in this paper. Something new. Don't forget the date.

FOR SALE—Barred Rock Hatching Eggs, Lethbridge Experimental Farm strain. \$3.00 per setting of 15. Apply—Mr. Dean C. Larsen Box 91, Raymond. j 19

People who want the very best  
use Red Rose Orange Pekoe Tea.

## A Land of Opportunity and Service

Canada, and Western Canada in particular, has frequently been described as a young man's country—a country in which the humblest boy possessed of ability and energy, plus ambition, has an opportunity of rising to the top in any walk of life he may choose, and of achieving the highest position which it is within the power of his fellow citizens to bestow. Over and over again has the correctness of this opinion been verified in the lives of young men who have risen to positions of influence and power in this country whereas they probably would have led uneventful lives had they remained in their old environment.

It is doubtful, however, if quite so striking an example of the rapid rise of a young man from very humble surroundings to a high and honored position has ever been afforded as in the case of Hon. Charles A. Dunning, until a few days ago Premier of Saskatchewan and now Minister of Railways and Canals in the Dominion Government. The story of Mr. Dunning's life since coming to Western Canada reads like a romantic fairy tale.

Mr. Dunning has not yet reached his forty-first birthday, having been born in Leicestershire, England, on July 31, 1885. As a youth of 17, and delicate in health, he emigrated to Saskatchewan and began work as a farm hand. The following year he homesteaded at Beaverdale, Sask., and, like all new settlers without worldly wealth, began to break his quarter section and erect his log and sod buildings. In the year prior to Mr. Dunning's arrival in what is now the Province of Saskatchewan, the Territorial Grain Growers' Association was organized, and the newly-arrived English lad soon identified himself with the "Local" in his district, and thus commenced to render public service and climb the ladder of fame.

Within a few years he was a director of the Association, then vice-president for four years. During this period the Saskatchewan Co-operative Elevator Co. was created, and Mr. Dunning was appointed its first General Manager, which position he held for six years, developing the infant Company until it reached the position of being the world's greatest initial grain handling concern. Then, in 1916, when W. M. Martin succeeded Walter Scott as Premier of Saskatchewan, he called Mr. Dunning to his cabinet as Provincial Treasurer, and, with the possible exception of Quebec, no Province's finances were better handled during the last of the war years and during the difficult years of readjustment and depression that followed than were those of Saskatchewan.

In 1922, Mr. Martin retired from the Premiership, and Mr. Dunning was the unanimous choice of the Liberals of Saskatchewan as his successor. Thus within nine years of arriving in Saskatchewan, and at the early age of 26, Mr. Dunning was General Manager of one of the Dominion's biggest companies; at the age of 31 this English emigrant lad was a cabinet minister; at 37 he was Prime Minister of the Province. What other country can offer a parallel to such a record?

During the war Mr. Dunning threw his abounding energy and organizing abilities into the task of furnishing the wherewithal to enable Canada and the Empire to win the war, and successfully play their part. He was chairman of the Victory Loans campaigns in Saskatchewan for two years in succession, and Director of Food Production in Canada during the last critical year.

And now, secure in the Premiership, with an overwhelming majority in the Legislature following an election of less than a year ago, Mr. Dunning relinquishes a safe and comparatively easy position to go to Ottawa and take over one of the heaviest and most responsible portfolios in the Dominion Government. And those who know him most intimately are agreed that he does so in order that he may thereby render still greater service to the country of his adoption and the Empire which gave him birth.

It is well for Canada that it can provide such opportunities for advancement to its people, and it is even better for Canada that when the occasion and the need arise, her sons are willing to give her their very best in effort and service.

Apart altogether from partisan feelings and affiliations, the people of Western Canada are proud of the achievements of Mr. Dunning and rejoice to have him in the Government at Ottawa at a time when strong men, filled with initiative, and capable of safe but progressive leadership are urgently needed. Although a Westerner by his own choice, and fully seized with the problems and needs of this section of the Dominion, Mr. Dunning's vision is not restricted to the prairies. He will approach and deal with Canadian problems, not from any narrow or sectional viewpoint, but in the interests of Canada as a whole.

Knowing the West as he does and its enormous possibilities, he will apply his energies beneficially for the West, not because it is the West, but because thereby the welfare and prosperity of Canada as a national unit will be advanced. Political friend and political foe will, therefore, be found uniting in a hope that the same unbroken record of successful achievement which has marked his career in the past will be surpassed in the larger arena of national affairs. It is Canada which will be the gainer thereby.

### Scenic Parks

Of the seven great scenic parks under Dominion control in the Rockies and Selkirk, three are in Alberta and four in British Columbia. Waterton Lakes, Rocky Mountains (Banff), and Jasper National Parks are in Alberta, and Yoho, Glacier, Kootenay, and Revelstoke National Parks are in British Columbia.

### Canada's Wool Clip

Canada's wool clip for 1925 amounted to 15,553,015 lbs., valued at \$4,199,000, as compared with 15,111,719 pounds, valued at \$3,771,000, in 1924, and according to a provisional estimate, Ontario had the greatest production last year, with an output of 4,825,745 pounds.

## Children Cry for

**Fletcher's CASTORIA**

MOTHER:—Fletcher's Castoria is especially prepared to relieve infants in arms and Children all ages of Constipation, Flatulency, Wind, Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitations, always look for the signature of *Charles H. Fletcher*. Absolutely Harmless—No Opium. Physicians everywhere recommend it.

### Gigantic Airship Lines

Service Will Bring Canada Within Thirty Hours of Great Britain

Gigantic airships on lines encircling the globe, with fast aeroplane feeding them, were outlined in a comprehensive address on "progress in civil aviation" by Air Vice-Marshal Sir Sefton Brankner, K.C.B., director of civil aviation in the British air ministry, at the Empire Club, Toronto.

Great Britain is devoting much money in the development of two gigantic airships, each with a capacity of 5,000,000 cubic feet, which is twice the size of any airship flown so far, for a service between India and London, England, and which eventually will include Australia. This in turn will bring Canada within 25 or 30 hours from the old land, Sir Sefton declared.

The new ship will carry one hundred passengers comfortably and every convenience will be provided. The trip to India is planned to take 100 hours flat without a stop.

One ship will burn heavy oil in the engines, while the other will derive its power from a mixture of kerosene and hydrogen, which is an experiment.

### A SPRING TONIC

#### AN AID TO HEALTH

You Can Lay the Foundation of Good Health Now by Building Up Your Blood and Strengthening Your Nerves Through the Use of Dr. Williams' Pink Pills.

The good old fashion of taking a tonic in the spring time, like most of the customs of our grandparents, is based upon sound common sense and good medical practice. Winter is always a trying time for those who are not in perfect health. Many men, women and children go through the winter on reserve strength they have stored up during the sunny summer months, and grow increasingly pale and languid as the spring days approach. A tonic for the blood and nerves at this time will do much to cheer people by putting color in the cheeks and banishing that tired feeling that worries thousands of people at this season of the year.

It is impossible to be energetic if your blood is thin and weak, or if your nerves are frayed or shattered. You cannot compete with others if you do not get refreshing sleep at night, or if your appetite is poor or you are losing weight. You need a tonic at this time to add to your efficiency now, as well as to save you from suffering later on. And in all the realm of medicine there is no safer or better tonic than Dr. Williams' Pink Pills. These pills tone and enrich the blood which circulates through every portion of the body, strengthening faded nerves and run-down organs, and bringing a feeling of new strength and energy to weak, easily tired, despondent men, women and children.

Miss K. Strals, Kamouraska, Que., says: "I would feel that I was neglecting an opportunity to help some other poor sufferer if I failed to tell you how much benefit I had through the use of Dr. Williams' Pink Pills. Before taking the pills I was in a badly run-down condition. I was very weak, pale and breathless at the least exertion. I often had headaches and my appetite was poor. I began taking the pills and they restored me to better health than I had enjoyed for a long time; in fact, my health is now the best, and I am sure that what this medicine has done for me it will do for all weak, ailing people."

You can get these pills from any medicine dealer, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Through Service For Steamship Passengers

Canadian Pacific Railway Inaugurates Through Tourist Sleeping Car Service

For the convenience of western passengers enroute to the Old Country, the Canadian Pacific Railway have inaugurated a through tourist sleeping car service from Winnipeg to Saint John, N.B.

These cars will leave Winnipeg on "The Imperial" at 10:00 a.m. every Tuesday until April 20th, providing through service to the ship's side at Saint John.

This service will prove extremely popular with passengers from the prairie provinces, eliminating as it does, changing trains at Montreal.

### Not Concerned Over Casualties

U. S. Calmly Accepts High Death Rate From Auto Accidents

In the United States the death rate from automobile accidents is forty-eight every twenty-four hours, with 100 injured in that period. The most peculiar fact associated with these figures, according to statisticians who are studying them, is that the people show little or no concern over the large casualty rate, although it was were taking that many every day there would be great excitement about it.

No man will ever be bored as long as you talk to him about himself.

**SPOHN'S DISTEMPER COMPOUND**

Keep your horses working with SPOHN'S. Standard remedy for 32 years for Distemper, Strangles, Influenza, Coughs and Colds. Give to sick and those exposed. Give SPOHN'S for Dog Distemper. Sold by your druggist. If not order from us. Two sizes, large and small. Write for free booklet on Diseases. SPOHN MEDICAL CO., Dept. 23 CSMEN, IHO.

### Pan-American Congress

Plea For Canada's Entry Into Congress Is Made At Toronto

Canada's entry into the Pan-American congress was urged by Dr. Clarence J. Owens, president of the Pan-American Commercial congress, in an address to the Canadian Club at Toronto. He also expressed the hope that Canada would recognize the United States diplomatically, and send a representative to Washington.

In pleading for Canada's entry in the Pan-American congress, Dr. Owens pointed out that in the new Pan-American building the Canadian coat-of-arms occupied a position of honor with that of the United States, and that a Canadian chair, provided for the governing board, was no doubt still stored somewhere in the building.

An official invitation has been sent to Ottawa by the Pan-American congress, Dr. Owens said, and he was confident that before long the congress would be truly Pan-American, which it could not really be so long as Canada was not a member.

### Has Compiled "Sound Portraits"

Among Records Taken By Berlin Professor Is Muezzin's Call to Prayer

Many of the sounds of the present age will be heard 10,000 years from now, if the claims of Professor William Dooega, state librarian of Berlin, are confirmed in that time. Prof. Dooega has compiled a collection of 2,500 sounds of the present age on master phonograph records made of brass and will file them away for posterity. He took records of the sounds of war during the world war, street sounds in the big cities, language sounds of 250 different tribes in Asia and Europe, and, of course, all metropolitan speaking and singing sounds. Among other novelties is the Mohammedan muezzin's call to prayer.

### Russian Palaces For Sale

Soviets Would Sell Or Lease Property Of Late Czar

Foreigners who have dreamed of possessing palaces are given an opportunity by the Soviet Government of realizing their dreams. There are several disused palaces in Leningrad, formerly the property of the emperor and members of his family, which the government will be glad to sell or lease to foreigners for periods ranging from 25 to 50 years. The only condition is that a buyer or lessee shall put the building in proper repair and shall pay the usual taxes to the government.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

The woman who doesn't understand the art of making over last year's hat should never marry a man to reform him.

### Girls! Your Health!

—Mickelthwait Studio

Toronto, Ont.—"Dr. Pierce's Favorite Prescription is a godsend to women and girls who have become run-down in health. When I was a girl, I became all run-down in health, was weak and nervous, suffered from irregularity, and at times with pains. I was as miserable as could be, when, upon the advice of a friend, I took the 'Favorite Prescription' and it corrected all my trouble. I did not suffer any more, my nerves grew strong and I gained in health and strength very rapidly. After I married I took the 'Favorite Prescription' and it gave me wonderful relief."—Mrs. Elizabeth Penman, 205 Oak St. All druggists.

This Prescription is made in Dr. Pierce's Laboratory in Bridgeburg, Ont. Send 10 cents there if you wish a trial package of the tablets.

### Will Be Boon To Motorists

Steam Cooling Said to Keep Engine At Even Temperature

Freezing in winter and overheating in summer will no longer threaten motorists, if advocates of steam cooling have their hopes fulfilled. Steam cooling, they say, is the cure-all for these ills.

Steam cooling is a method by which the water in the cooling system keeps the engine at an efficient temperature summer and winter, yet evaporates at the boiling point; it is cooled through the radiator and returns into the system still warm enough to keep the temperature of the engine even at all times.

One advantage claimed for this system is that there is no worry about radiator leakage, since the radiator connection is at the bottom and the condensed vapor flows down, past any small holes that might appear through rust. In fact, there's mighty little chance for rust, because rust is said to come from cold water, not water that's kept at a high temperature.

## COLOR IT NEW WITH "DIAMOND DYES"

Just Dip to Tint or Boil to Dye

Each 15-cent package contains directions so simple any woman can tint soft, delicate shades of dye rich, permanent colors in lingerie, silks, ribbons, skirts, waists, dresses, coats, stockings, sweaters, drapery, coverings, hangings—everything! Buy Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

### Humanity And Kindness

Institution in Texas Has Made Some Needed Changes

Humanitarianism mixed with kindness, good food and entertainment has removed the shackles of restraint from the six insane asylums of Texas. Straight jackets, padded cells and restraint beds are now articles of a forgotten age in the institutions. Beautiful dancing and exercise are now at the convenience of the 9,000 inmates.

A violent inmate brought into the peaceful surroundings of these institutions within less than a week becomes docile and industrious, according to R. B. Walthall, member of the board.

### Rug Making An Art

Workers Have to Thoroughly Understand Colors and Dyes

In making certain colored fabrics like rugs, tapestries and similar materials, it is necessary to have a large number of color standards and in the rug industry some mills have as high as 5,000 standards from which they work. The men in charge of the colors and dyes are artists as well as craftsmen, and they have to have almost infinite patience in working with the aniline dyes used in getting the color values for each job. A few grains of dye in a thousand gallons of water materially changes the color of a hundred pounds of yarn.

### Testing Them Out

"Tell the janitor to put up notices that no book agents are to be admitted to the building," said the publisher. "But you have just advertised for agents to sell our new work," protested the secretary.

"Of course. I want to try the applicants out. If a man could be stopped by a little thing like that, what good would he be to us?"—Washington Star.

"There are times when I wish I were a man," she said wistfully. "When?" inquired her husband. "When I pass a milliner's shop and think how happy I could make my wife by giving her a new spring hat."

The man never lived who didn't at some time in his life expect to invent something that would make him rich.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

The skins of sharks, porpoise and other kinds of fish have been developed into excellent commercial leather.

George Westinghouse was born in New York, where he worked in his father's machine shop.

Minard's Liniment for sore throat

## Young vigor to old folks

"My nerves were unstrung and I used to tremble all over. Lay awake at night; rose exhausted each morning. Tanlac restored health and appetite. I am 71, but now eat and work as well as 20 years ago." Harry Johnson, 53 Elm St., Windsor, Ont.

One of Tanlac's greatest blessings is the new life and vigor it brings to old folks. Every day men and women up in the seventies and eighties thank us for Tanlac's wondrous benefits.

Tanlac is a natural tonic, made from roots, barks and rare herbs. Harmless to man or child. It cleans the blood, stirs up the liver and puts digestive organs in working order.

If your body is weak and run-down, if you lack ambition, can't eat or sleep, you'll be delighted with Tanlac's results. Take Tanlac Vegetable Pills for constipation.

### Keeping Check On Air Traffic

Officer Knows Actual Position of Every Machine Flying In British Area

At Croydon are the beginnings of a system that will, without doubt, spread in every direction as commercial traffic increases in volume. A control tower contains a traffic officer checking the air traffic on any air route within the British area. His position reports enable him to know from minute to minute the actual position of any machine in flight and beside him is a wireless operator. The traffic officer is therefore able to supply information to any pilot who may need navigation assistance.

### Insured Their Brains

Insuring brains is the latest. Two Detroit men, Norbert A. and J. Arthur Hoffman, launching a heavy building programme, have taken out a policy of a million dollars on their brains, to protect the interests of the partnership during the expansion in case of the death of either partner.

**NABOB VACUUM PACKED COFFEE**

Kept fresh in the Vacuum Tin

### Banish The Blues

By Observing Nature's Basic Rule

Those who suffer from despondency, listlessness and headaches can usually trace the cause of these conditions to constipation.

They are frequently brought about by overwork, nervous strain, lack of outdoor exercise or sleep, or improper food, but more frequently by the non-observance of nature's basic rule—regular thorough bowel elimination.

Poisons from waste matter left behind are picked up by the blood and absorbed by the system, weakening the nerves and lowering the vitality.

Nujol, the scientific internal lubricant, corrects constipation in nature's own way by augmenting the supply of nature's lubricant.

Nujol by softening the waste matter thus permits thorough and regular elimination without overtaxing the intestinal muscles. It is gentle, safe and natural in its action, and can be taken for any length of time without any ill effect.

Ask your druggist for Nujol today and remember—look for the name "Nujol" in red on both bottle, label and package.

### LEG SORES

ARE CURABLE. If you suffer from Leg Sores or Varicose Ulcers, I will send you absolutely FREE a copy of my famous book that tells how to be rid of these troubles for all time by using my remarkable painless treatment. It is different from anything you ever heard of, and the result of over 25 years' specialising. Simply send your name and address to Dr. H. J. WHITTIER, Suite 29, 411 East 11th Street, Kansas City, Mo.

**SLUGGISHNESS** of mind and body points to de-ranged Kidneys. GIN Pills will restore the Kidneys to normal action and guard against more serious diseases.

**GIN PILLS FOR THE KIDNEYS**

# League Of Nations Report Shows Slavery Still Exists In Many Parts Of The World

It is difficult for people on this continent to realize that a million men, women and children in the world are condemned to the inhuman miseries of slavery.

The evil is too gigantic to permit the comfortable illusion that only its smoldering embers remain. In some parts of the world it flourishes openly in all the horrors of its traditional form. In others it abounds in new disguises, equally deadly in their bonds of servitude. Their existence might be unbelievable without the disclosures being made by the League of Nations, which has a commission charged with the discovery of the forms slavery is now taking, and with an attack upon their continuance.

Though slavery still persists in many of its habitual regions in Africa, its more dangerous phases, because they are less definable, are found in many quarters of the globe. It is true that Africans captured chiefly in Northern Africa are transported mainly through Egypt and Somali into the Near East, and there held in abject slavery. It is true, too, that children, especially girls, are brought from the Far East on pilgrimages to Mecca, and sold by their parents into slavery in Arabia. And it is stated to be equally undeniable that under the government of freed slaves ruling the republic of Liberia, slavery is permitted and practiced.

A United States commission of inquiry has submitted to the league a report of harrowing conditions found in Portuguese Africa, notably in Angola and Mozambique. In fact, the whole story of slavery in the world as revealed by the commission of the League of Nations is one of grave and disgusting import. It is based on evidence already admitted to be of a nature so sensational that, for reasons seemingly not yet revealed to the world, Mr. Ponsbury, who was under-secretary of state for foreign affairs in the British Labor Government, declined to have it divulged in full, as it was "not in the public interest to let the world know what was going on."

China declares it does not allow slavery, but that does not prevent the Archbishop of Canterbury from being presented with damning evidence to the contrary. He so doubted the sincerity of the dark picture portrayed to him that he sought information from "an eminent Chinaman who is in this country (England)." He was informed the picture was not nearly dark enough. The archbishop suggested that though slavery might pertain to Western China, it could not be prevalent in the great cities of the east. The eminent Chinaman replied: "Oh, yes, it is. I could buy slaves in half an hour. There is not the slightest difficulty in buying girls; I could buy them anywhere."

Such evidence of slave trafficking in China is verified by investigations instituted by the International Labor Office at Geneva. These reveal a horrible state of sale and debauchment in slavery of female children. "Such sale of female children," says the report, "although undoubtedly contrary to Chinese law, does not appear to be interfered with in any way by those charged with the administration of justice."

## Grain Lost In Transit

Only 21,454 Bushels Grain Lost In Transporting 288,837 Cars

On the basis of claims presented to the grain commission during the crop year ended July 31, 1925, only 21,454 bushels were lost in transporting 288,837 cars of grain from the prairies to the head of the lakes.

In answer to a question asked by John Miller, M.P. for Qu'Appelle, it was stated by the government that only 515 claims were filed or about 18 per cent. of the cars loaded.

The minimum loss reported was \$40 lbs.; the maximum 11,909 lbs.; and the average 2,500 lbs.

**Dairy Production In Alberta**  
- Alberta's dairy production in 1925 amounted to \$23,092,000, a slight decrease from the figures of the preceding year, according to a report of the provincial dairy commissioner. The production last year was made up of the following items: 19,500,000 lbs. of creamery butter, valued at \$6,873,600; 1,375,000 lbs. of factory cheese, worth \$278,400; and other products, valued at \$15,550,000.

As a rule the people who howl for free speech are the kind that get mad if you don't stand and listen.

The man who is constantly in the public eye is apt to get an occasional reb from the public knuckles.

W. N. U. 1622

## Home-Cured Pork and Beef

Exhibit Of Farm Dressed Meats Is Shown at Saskatoon

One of the most striking features of the livestock demonstration put on by the animal husbandry department of the Saskatchewan College of Agriculture at the recent convention of agricultural societies was an exhibit of home-cured pork and beef.

A select cure was first shown to show the source of meat of even quality with that shown in a cured state. The finished product was hung on the rail, dishes made from it were displayed on a table beneath and prepared most temptingly, and the equipment for curing also exhibited. To complete the effect, sandwiches made from the final cooked ham were distributed to the delegates with coffee.

A review of current prices showed a striking spread between the dressed carcasses uncured and the treated bacon and ham. Whereas it paid better as a rule to sell live hogs than dressed carcasses from the farm, the saving on home-cured meats as compared with buying them made it appear well worth while to cure a carcass for home use.

## Discovery Will Be Welcomed

U. S. Professor Finds Mixture Guaranteed To Repel Mosquitoes

Discovery of a mosquito repellent is announced by Dr. William Rudolph, instructor of entomology at Rutgers University.

The discovery was the result of a four-year study. "The best protection can be secured by mixing ordinary insect powder extract with vasoline, cold cream, or face powders," he says. "For making a repellent about fourteen parts of oil or extract was mixed with 94 to 96 parts of vasoline or cold cream. In case a powder is wanted the substance can be mixed with wheat flour, or talcum powder."

Dr. Rudolph explained that in mixing the ingredients he used as much oil as the powder would absorb without becoming pasty. The mixture, he announced, afforded protection for about two or three hours. He also said that the tests were carried on when mosquitoes were alighting upon the experimenter at the rate of from five to twenty a minute.

## Spring On the Prairies

You Get The Sensation of Truly Living In The Wide Open Spaces

It is in the early spring, too, that one gets out there the sensation of truly living on the great prairies. You go out into the west-pasture and you seem to feel the country stretching away in rolling farm lands for hundreds of miles in every direction, cities dwarfed, houses and barns levelled and boundary lines obliterated, as they all look on a schoolroom map. Local activity in summer and fall partially dispels this feeling, but in the spring you get to know the thrill connected in that term, "Western prairie lands."

"Probably for this reason this is the time of year when the inherited pioneering blood surges up out there. You grow restless, tug at your tether ropes and fight the temptation to pull up stakes and get out on the road leading 'farther west.'—New York Evening Post.

## Consumption Of Meat

Eating More Meat But Less Pork In United States

The average consumption of meat in the United States was greater in 1925 than in any year since federal meat inspection was instituted in 1907, says the report of the national livestock and meat board.

The use of pork declined from past years, probably due to higher prices incident to the 20 per cent. decrease in hog receipts at central markets, but veal, beef and mutton all increased.

The average person in the United States last year consumed 154.3 pounds of meat, the report shows. This was four pounds greater than the average consumption for the last 18 years.

## How To Avoid A Collision

If a car should suddenly drive across the path of your car, or if a car ahead should turn to the left as you were starting to pass it, turn your car quickly in the same direction taken by the other car, at the same time slowing your car's speed. If an attempt were made to bring your car to a stop without turning, the probability is that you could not stop in time to avoid a collision.

## Prairies Have Not Reached Horseless Age

Regina Firm Cannot Keep Up With Orders For Harness

While some people have been pointing with justifiable pride to the number of automobiles in Saskatchewan and talking glibly of the "horseless age," quite a few other busy people are saying little but quietly making a profit out of the knowledge that horses are very much in evidence in this prairie province just now.

Back in the days when land prices were skyrocketing, Regina citizens used to boast about living in the greatest farm implement distributing centre in the world, at the same time admitting they were taking in quite a bit of territory. Now note what is doing in the harness business: One Regina wholesale firm has already sold 850 dozen horse collars alone this year. That's enough to provide a new spring collar for 11,400 horses. The manager of that concern admitted he was doing great business.

"Nothing like it in the history of this firm," declared the manager of another big wholesale house. "I should know something about it," he continued, "as I have been local manager for 18 years." He figured the total spring business from Regina alone would run to 8,000 complete sets. But there is a fly in the ointment. This great demand for harness in a horseless age was hardly anticipated. Factories in Eastern Canada are unable to keep up with the orders. Goods that should have arrived here early in February are being held off, and at least one-third of the orders remain unfilled, while telegrams flash back and forth between jobbers and factories.

## Saskatchewan Egg Pool

Nearly Forty Receiving and Six Canning Stations Established

Establishment of a branch office at Brandon is proposed by the Saskatchewan Egg and Poultry Pool, which will begin operations shortly, Ralph Brightly, general manager, stated today that the branch would handle only Eastern Saskatchewan eggs.

Nearly forty receiving stations have been established by the pool in Saskatchewan together with six canning stations at Regina, Moose Jaw, Assiniboia, Swift Current, Saskatoon and Humboldt.

To date the pool has 10,600 contracts signed and the campaign is well advanced. Organization work has not yet reached the stage where the date on which the pool will come into operation can be announced, Mr. Brightly stated.

"We're going to learn fretwork at school, mother."

"Then I shall send you to another school, or you'll be growing up like your father. He works on Monday, and frets about it the rest of the week."

The Duke and Duchess of Atholl

Who have just celebrated their silver wedding. The duchess will attend the third triennial conference of the National Council of Education to be held at Montreal, April 5-9. Her Grace will attend in her capacity as parliamentary under-secretary of the British Department of Education.

## Americans Buy B.C. Lumber

Millions Said To Be Invested By Big New York Interests

Announcement is made of the purchase by New York and Florida interests of 4,000,000 feet of standing timber, a ten-acre site and single mill located on Coal Harbor, almost in the heart of the city, a mill site on Lulu Island, opposite New Westminster, and sundry other assets of the old British Timber Corporation. The amount of money involved was not made known, but is estimated to run into millions. A new company known as the Great Western Corporation has been incorporated with a capitalization of \$1,000,000 and this amount will be increased, it is expected.

Howard Cole, prominent lumberman of New York, is president of the new company, while Buckner Shipley of Palm Beach, Fla., is associated with it.

One of the first developments will be the construction of a mill on Lulu Island. The Coal Harbor property which has become almost too valuable for sawmill purposes, probably will be reserved for industrial purposes.

Of the timber secured, three billion feet is in the Massett Valley district of Queen Charlotte Island, north of Sooke, and a number of tracts along Bear Creek in the Kootenay are included.

## Add New Empire

Early Maturing Wheat Will Push Agricultural Belt Further North

"The discovery of varieties of wheat which mature early, such as Marquis and the new variety known as Garret, has pushed the agricultural line in the prairie provinces 60 miles further north, according to a bulletin issued by the Canadian department of trade and commerce. Thus it may be estimated that a vast new empire comprising some 56,000 square miles, or 32,000,000 acres, will, in the course of time, add its quota to the golden harvest of the Canadian west," says the Quebec Chronicle.

The agricultural wealth of the three prairie provinces is at present estimated at \$2,500,000,000. Manitoba, larger than Germany, Belgium and Holland combined, had less than 7,000,000 acres under cultivation in 1925 and only 14,000,000 acres occupied; Saskatchewan with 161,000,000 acres, is cultivating less than 17 per cent.; Alberta, with practically the same area, has only 40,000,000 acres disposed of, out of 60,000,000 acres of agricultural lands already surveyed.

Teacher (to boy sitting idly in school during writing time):—"Henry, why are you not writing?"  
Henry:—"I ain't got no pen."  
Teacher:—"Where's your grammar?"  
Henry:—"She's dead."

"I'll never ask another woman to marry me as long as I live."  
"Refused again?"  
"No, accepted."

# Effort Being Made To Increase The Growing Of Forage Crops In The Western Provinces

## Has Had Successful Year

Pouche Coupe Creamery Is 400 Miles From Nearest Market

British Columbia's—if not Canada's—most northerly creamery, that of the Pouche Coupe Creamery Association, has just concluded its second year's operation and at the annual meeting, recently held at Dawson Creek, Peace River, B.C., much satisfaction was expressed at the results.

Situated 100 miles from the railway and practically 400 miles from its nearest market, this creamery association has surmounted the almost overwhelming overhead in additional freight charges incidental to trail and rail of such distance and has paid a satisfactory return to its patrons, some 70 in number. Most are married settlers and by their cream cheques receive sufficient to meet their grocery bills.

Owing to the scattered population long distances have to be travelled to secure a sufficient supply of cream to keep operating, the furthest point reached being the soldier settlements at Cutbank and Sunset Prairie, 40 miles away.

During the year 34,000 lbs. of butterfat were manufactured and sold for \$11,784. Dressed poultry to the value of nearly \$1,100 was also sold. After paying expenses and setting aside a sufficient sum for repayment of mortgage on machinery and depreciation on plant and buildings, nearly \$8,000 was distributed to the patrons.

Provisions for paying off mortgage on machinery, reserves for depreciation of machinery and building were also made out of the surplus.

## Farmers Receive \$37,000,000

Enormous Sums Received By Western Farmers By Recent Wheat Pool Payment

The wheat pools in the three prairie provinces—Manitoba, Saskatchewan and Alberta—made a further payment recently to farmers who are members of the pool of twenty cents a bushel on all grades of wheat. For coarse grains six cents per bushel was paid on oats and barley; ten cents on rye; and twelve cents on wheat. Approximately 190,000 checks were mailed from the three provincial offices, amounting to a total of about \$37,000,000.

The wheat pools are co-operative organizations controlled by the farmers of the western provinces for the marketing of their grain. Initial payments are made to the farmers when the grade is delivered and further payments as the pools' operations for the season become apparent. The payment just made, representing a distribution of \$37,000,000 among western farmers, will be an important factor in promoting industrial and agricultural prosperity in Western Canada during the next few months.

## Settlers From Holland

Party Brought Out By Holland Colonization Board of Saskatoon

More than 200 Dutch agriculturists, the first large party of Hollanders to be brought to Canada this year by the Holland Colonization Board of Saskatchewan, with headquarters at Saskatoon, sailed from Holland recently, G. H. Hooft, chairman of the board, announced.

The party includes 117 single men, 20 families and 12 domestics. Twenty-five of the men will settle in the Yorkton district, 20 more in the Prince Albert area, and the remainder including all of the families, will be established in the Nipawin Valley.

## Canadian Bulbs May Find Market

Canadian growers of flowers, at least some of them, are coming round to a belief that Canadian enterprise and ingenuity ought to be encouraged more than at present. There is satisfaction in knowing that the idea is receiving some thought and publicity, and that before many years have passed bulbs originating in this country may find a market even in Holland; in any event, everywhere on the American continent. Guelph Mercury.

## An Up-to-Date Tomb

A telephone and electric lights grace the interior of the mausoleum in which the body of Martin A. Sheets, wealthy stockbroker, was entombed in Terre Haute, Ind. Sheets asked that his tomb be so equipped that he might have opportunity to talk with the outside world if he should awaken.

Alberta's wool clip has grown from zero to 2,500,000 pounds in the course of a few years. About 300,000 sheep were clipped last season.

The continued interest of the Canadian Pacific Railway in progress of agriculturalists who have settled in territory served by its lines is continually being evidenced in fresh manner. This spring, in an effort to increase the growing of forage crops, through certain sections of the prairie provinces, a vigorous campaign of encouragement and practical assistance will be prosecuted through arrangements which have been made between the Canadian Pacific Railway and the provincial departments of agriculture. In each province of Manitoba, Saskatchewan and Alberta a special forage car will circulate through the districts it is desired to reach carrying to them the doctrine of a safer and more stabilized system of farming.

The Canadian Pacific Railway has equipped and is operating the car free of charge in each province, and this will contain samples of various forage seeds and be staffed by experts supplied by the provincial department of agriculture who will lecture at the various stops. Attached also are cars carrying a liberal supply of seed which will be disposed of to farmers in small lots for experimental purposes, growers being able to secure sufficient for areas up to five acres. Small packages of corn will be distributed to school children, enough to seed one quarter of an acre, and they will have an opportunity to enter various competitions held in the fall in connection with the corn show which is now an established institution in each province. In Alberta the tree planting car, which has performed such valuable work in the past, is accompanying the forage car.

Throughout the campaign special emphasis will be placed on the growing of fodder crops which have been found best adapted to local conditions. A great deal of knowledge has developed out of the experiments and experiences of the past fifteen years and an effort is being made to carry this to the parts of the country where its application is likely to prove of the greatest value. Corn growing for fodder will be given the attention its growing importance warrants, whilst sweet clover, brome grass, and alfalfa will also have their respective places in the campaign. In 1925 the three prairie provinces combined had 979,979 acres devoted to hay and clover which yielded 1,655,000 tons; 63,151 acres to alfalfa yielding 111,700 tons; and 166,220 acres to fodder corn yielding 548,000 tons.

## Becoming Menace To West

Destructive Rat Is Rapidly Invading Prairie Provinces

In the Saskatchewan Legislature, steps were taken to fight the invasion of the rat. It was stated that the territory east of a line drawn from the International boundary through Laupman, Broadview, Melville and Priestville, was now rat-infested and that the government was doing what it could to stop further incursions.

Up to ten years ago the rat was unknown in the three prairie provinces. There was great excitement when the first rat was discovered at Emerson, on the Manitoba boundary line. Little by little he made his way north until in Winnipeg today the rat is almost as common as in eastern cities. Then the rodent started pushing west, until now he has reached Saskatchewan, and the Saskatchewan Government is making a fight to prevent his further spread.—Kingston British Whig.

## Japs Eat Much Rice

Rice consumed in Japan in 1925 is estimated by the agriculture and forestry department at 355,000,000 bushels. Of this total 285,000,000 bushels were of domestic production, while the remainder was imported principally from Korea, China and Indo-China. Compared with the preceding year an increased consumption of 6,150,000 bushels is shown.

## Arabs In Palestine May Revolt

Clukey Jack, leader of the Arabian party in Palestine, has arrived at Geneva and sent a letter to Sir Eric Drummond, secretary-general of the League of Nations, declaring that the failure of the league to dispatch a commission to Palestine to examine the "pitiful situation of the Arabs" threatens to ferment a revolt there similar to that in Syria.

## More Area To Cover

Barber:—"You complain of our charge for shaving sir, but you must think of the extra labor!"  
Customer:—"What extra labor?"  
Barber:—"Well with the high cost of living, gentlemen's faces are long or than they were."

## For Sore Throat

Rub throat and chest with Vicks VapoRub. Its double direct action (inhaled and absorbed) brings welcome relief.

## Latest Idea In Surgery

Alberta Professor Discovers Medicine That Hastens Recovery Of Broken Bones

Medicine to speed up recovery from broken bones is the latest idea in surgery.

Bones consist largely of calcium phosphate, and after a fracture, fresh quantities of this substance must be taken from the blood for the formation of new bone. The healing process is slow owing to the small quantity of calcium and phosphorus in the blood.

Professor Collip, of the University of Alberta, Edmonton, obtained from the parathyroid glands an extract which, when injected or given by the mouth, increases the amount of both calcium and phosphate in the blood. The parathyroids are four small glands in the neck near the thyroid gland, or embedded in it.

The Sports Type Jumper As Worn In Paris

French fashion creators are still designing delightful two-piece sports frocks, one of which is pictured in this model of washable silk with the over-blouse in large plaid effect. Chic are the pockets and set-in vestee, with collar to be worn high or low. The long sleeves are gathered into cuffs with a rolled edge, and a narrow belt fastens smartly at the centre back with a buckle. Joined to a camisole top is the skirt with box-plaits at front to supply fullness, yet retain the desired straight effect. No. 1261 is in sizes 16, 18 and 20 years, or 34, 36 and 38 inches bust only. Size 18 years (36 bust) requires 4 yards 36-inch, or 2 1/2 yards 54-inch material, with 3/4 yard lining for camisole top. Price 20 cents.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dresser. Price of the book 10 cents the copy.

## SUNDAY SCHOOL LESSON

APRIL 4

## JESUS APPEARS TO HIS DISCIPLES (EASTER LESSON)

Golden Text: Because thou hast seen me, thou hast believed; blessed are they that have not seen, and yet have believed. John 20:29.

Lesson: John 20:24-21:25.

Devotional Reading: Revelation 1:9-18.

## Explanations and Comments

The Risen Savior Appears to the Disciples in the Upper Room, 20:19-25. —On the evening of the Sunday following the crucifixion, Christ appeared to the disciples in the room where they were assembled. That his body was no longer subject to ordinary laws, is indicated by his sudden appearance in their midst although the doors were closed. "Peace be unto you," was his greeting, and then to convince them of his identity, he showed them his pierced hands and side. The disciples believed and rejoiced. Again he said, "Peace be unto you," and added, "As my Father hath sent me, even so send I you."

"An associate and friend of years," Dr. Henry Ostrom, has described an African prince visiting the African settlement at the St. Louis Exposition. He was clad in citizen's clothes, and the people from Africa appeared in their native costumes. When this stranger proclaimed himself a prince they ridiculed him. However, an aged man said, "I can tell whether you are a prince of the royal blood, and he ran his fingers down the back of the neck of the one who claimed to be a prince and found the scar that was there, the mark of his royalty. Then the aged man told upon his knees with all the others to worship him. And Christ stands before us as the Lamb that had been slain; scars in his hands and feet, in his side and back and on his brow. He is our Redeemer" (Dr. J. Wilber Chapman).

Of the 667 professions listed in the United States, women are engaged in 632.

## VETERINARY DOCTORS

use and recommend Minard's Liniment. Splendid for sprains, bruises, cuts, chafes, swellings.

## ON THE AIR

What Is Doing in the World of Radio

KFI station at Los Angeles has an arrangement which cuts off an entertainer or speaker without the person knowing that he is talking to a "dead mike."

A Missouri lady radio fan sends this in to a Kansas City broadcasting station: "Since your station started broadcasting our cat sleeps in the barn."

The biggest radio station in the world is that of Rugby, England, which covers nine hundred acres and has twelve steel masts, each more than eight hundred feet high. The total length of wires used in its aerials is more than three miles. It uses a super-power of 100 kilowatts and a wave length of about 6,000 meters.

The first wireless station on the Alps has been fitted up. It is located on St. Margaret's Hut, which is 5,250 feet above sea level on the route to the summit of Mount Rosa. Generally, when a climber is in danger and help is needed, the guide has to spend many hours getting down to the foot to secure assistance. With this wireless station at the top, all that is necessary is to send a summons, and in the next few minutes help will already be on the way.

Practically all large broadcast stations in New York are booked solid for advertising. It is difficult for anyone to get advertising through these stations even at advance rates. WJAF leads all other stations for advertising accounts and revenue. The charge made by this station is said to range from \$400 to \$600 per hour. WJAF is another New York station which "carries" a great amount of advertising at a rate said to be \$500 an hour. Other broadcasting stations throughout the country charge stiff rates for the use of their studio, but the average cost is estimated at \$75 an hour.

Neuralgia Conquered  
Its Pain Destroyed

Magical Results Come When You Apply

## NERVILINE

It Acts Quickly

Mr. W. T. Greenway, formerly connected with the Guide newspaper staff, writes: "I have used Nerviline in our home, and not for the world would we be without it. As a remedy for all pain, earache, toothache, cramps and disordered stomach, I know of no preparation so useful and quick to relieve as Nerviline. Remember this, wherever there is pain, rub on Nerviline, and you will get prompt results—35c at all dealers."

## Tip On Tacking

Tacks are elusive and hammers in the inexperienced hand bruise the fingers easily. Try this: Stick the tack through stiff paper or light cardboard, then hold the paper in the desired position. Thus you may hang away at Mr. Tack until he is subdued.

To Asthma Sufferers. Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope—something he has come to believe impossible. Its benefit is too evident to be questioned. It is its own best argument. If you suffer from asthma get this time-tested remedy and find help like thousands of others.

## Victims Of Wild Animals

Over 3,000 People Killed in British India Last Year

In British India alone last year it is reported 3,605 persons were killed by wild animals and 20,000 died from snake bites. Tigers accounted for 1,693 deaths; wolves for 835; leopards for 464; and crocodiles took the lives of 213. The wild pigs killed more than 100, bears and elephants about 70. During the year about 23,000 wild animals were killed, so that the ratio of human to wild animal deaths in the jungle is only about one to six.

## FREE GOVERNMENT INFORMATION

## The Newer Silage Crops

A WEALTH of valuable information regarding the newer Silage Crops is contained in Bulletin No. 50, "Silage—Sunflower, Corn, Sweet Clover and other Silages," recently issued by the Department of Agriculture, Ottawa. The Bulletin is a distinct contribution to our knowledge of silages other than corn, which may be grown in districts

where corn cannot be profitably raised.

- 59—Even (cont.).
- 61—A harrier to check the flow of a stream.

## Answer to Last Week's Puzzle

Some men earn their living by selling taffy and others by giving it away.

Her Heart  
Palpitated  
She Had  
Fainting Spells

Mrs. J. Wilson, Port George, N.S., writes: "I suffered from palpitation of the heart and fainting spells, and, at times, I could not be left alone I was so nervous."

My trouble was caused from overwork and worry, having been left alone with a large family.

I had tried everything, without any relief, but I knew, to-day, that I would have been a nervous wreck but for your wonderful

These Pills are for sale at all druggists and dealers; put up only by The T. Milburn Co., Limited, Toronto, Ont.

## TIPPITY-WITCH IRENE

## OH, YOU CHARLESTON

By COLLEEN MOORE

## Four Thousand Settlers Have Arrived In Canada Over The Week End

Halifax.—There was a distinct British flavor in the make-up of the 4,000 newcomers who arrived at this port during the weekend, afterwards to start their train journey to new homes in Canada, there being five Britishers to one from the continent. A particularly interesting feature of the migrants who landed is the number of families included, among those coming forward under the Empire Settlement Act. The greater number are destined for communities in the prairie provinces.

To handle the large number of new arrivals during the week the Canadian National Railways dispatched one special train every day until Saturday, when the number rose to three, while today five heavily laden steamship speads were sent away from the water front. In all thirteen special trains. This week has been the busiest in connection with immigration that port officials have experienced since the war years. In addition to the British settlers new Canadians from various points in the British Isles, Northern Ireland and preferred European countries have reached Halifax also.

The record number for a single group of families to leave England for Canada arrived by the Atlantic with 57 families in the one party.

Children under the 2,000 family scheme number 196 and one family, that of T. R. Rhodes, of Louthorpe, Middlesbrough, is able to host ten children of whom four are boys. This family is going to Regina. Under ordinary circumstances the fares for the family would be \$1,195, \$880 boat and \$215 rail. Under the low rates scheme the fare for the family is \$150.

### Scientists To Meet

To Tour United States and Canada After Convention Is Closed

New York.—Scientists representing a score of nations, unable to meet on a common footing since the outbreak of the war in 1914, will come together once more at the annual meeting of the International Scientific Association here, April 13.

Scientists representing technical societies and governments who will meet in the first complete round-table meeting in twelve years also will be meeting in the United States for the first time.

At the close of the convention delegates will tour the United States and Canada. They will be entertained by local committees in many cities.

### New Tariff Board

Hon. George P. Cramham Has Been Appointed Chairman

Ottawa.—In response to a query made in the House of Commons by Rt. Hon. Arthur Meighen, Premier King announced the personnel of Canada's new tariff board. Rt. Hon. George P. Cramham will be chairman and Joseph Daoust, of Montreal, and Donald G. MacKenzie, of Winnipeg, will constitute the tariff board.

Experts from the various branches of the government service and any other financial and economic experts will be called in to act in an advisory capacity occasionally. The commission itself will inquire into tariff matters and advise the government.

## Claim Immigrants Now Coming To Dominion Are Mainly British

Ottawa.—The department of immigration and colonization takes exception to a reported speech delivered in Montreal recently by William Hicks.

Objection is taken to the reported declaration that Canada was encouraging alien and not British immigration.

"An examination of the steamship manifests of all passenger ships arriving at Atlantic ports from the first of February to the fifth of March shows that a total of 2,316 passengers, 1,547 were British and 779 were aliens," states the department. "During the last fiscal year overseas British immigration totaled 55,178 against overseas alien immigration of 42,368, and in the previous fiscal year 72,919 British against 55,420 aliens. Not

W. N. U. 1622

### Lloydminster Oil Discovery

Recent Find Promises To Result In An Oil Boom

Saskatoon.—What promises to be an oil boom has started in the town of Lloydminster, Sask., with a number of claims already filed with the Dominion lands office at Prince Albert, where \$1,600 was taken in last Saturday.

It was a cow that made history by setting fire to the old city of Chicago. A cow, or rather cattle, have been the authors of the present excitement in the northern town, which, with the announcement that it will be made the divisional point of the new Canadian Pacific line, has made the place a booming settlement.

For the past two years John Marren, a farmer 12 miles south of town, on the Saskatchewan side of the Alberta boundary, has had difficulty in making his cattle drink the water from a 160-foot well situated on his property. Recently, at the instance of a visitor from Edmonton who was interested in oil development, a sample of the bottom of the shaft was sent to the University of Alberta for analysis. The answer from the analyst was that the sample was 75 per cent. of what is known as distillate, an even purer form of liquid fuel than the sticky, muddy liquid drilled in the Wahwright field, with which, according to the professor, this Lloydminster discovery has a geological connection.

### May Expect Large Orders

Australia Will Buy Canadian Newsprint Says Melbourne Editor

Vancouver.—Canada may expect a third or a half of the Australian newsprint orders, running more than a million pounds sterling as a result of the Australian-Canadian trade treaty, according to Keith Murdoch, editor and general manager of the Melbourne Herald, who arrived in Vancouver from the Orient on the Empress of Asia, enroute to London, England.

At first the treaty appeared to favor Canada. Sale of dried and canned fruits from Australia in this country, he thought would depend upon the attitude of exporters in Australia. It might be advantageous to have a resident Australian trade commissioner in this country, or some representative of the manufacturing and export houses. Conditions in Australia were bright he observed.

### Loaned To Canada

His Majesty King George Offers Valuable Casket To Be Preserved In Canadian Building In London

London.—His Majesty King George has offered Hon. P. C. Larkin, Canadian high commissioner in London, for preservation in the Canadian building in London as a permanent loan, the handsome casket which contained the address presented to King Edward by the survivors of the war of 1812-14, at Queenston Heights in 1890, when King Edward, as the Prince of Wales, was a visitor in the Dominion.

The casket is of black walnut, Canadian oak and Canadian maple. It is of beautiful workmanship, and is richly carved, and on it is a representation of the Prince of Wales' plume.

### Old Age Pension Scheme

Leading Conservatives Are Opposed To Plan

Ottawa.—The government's old age pension scheme was discussed at length in the house, but at adjournment the resolution outlining the scheme remained unpassed. Hon. Dr. King, who, as acting minister of labor, sponsored the resolution, took the ground that it was in the interests of the Dominion as a whole. Premier King observed that it might be desirable to have a meeting of provincial premiers, or representatives of the provincial governments, to consider how the plan might most effectively be worked out. He would like to see the plan develop into a system of social insurance, but this would be possible only with the co-operation of the provinces. He agreed that the contributory system was the only sound basis for a permanent scheme of old age pensions, but urged that the present plan aimed to assist those, approaching the 70 mark, who had helped to develop Canada in pioneer days.

Sir Henry Drayton took the ground that none of the provinces with one exception, wanted the legislation. R. S. White, Conservative of Montreal, thought the scheme entirely impracticable. Hon. R. B. Bennett urged the government not to proceed with the legislation. Only unanimous co-operation of the provinces, he claimed, would justify the Federal Government going into the scheme at this time.

### Will Not Postpone Conference

Imperial Parley Will Take Place In October As Arranged

London.—The Imperial conference arranged for next October will not be postponed according to the most reliable information, although representations to this effect have been made to the government since the disaster at Geneva.

It is pointed out to those who suggested postponement that the next meeting of the League council is scheduled for September, while the Imperial conference is to take place in the month following. It may be possible therefore for Dominion representatives to attend both gatherings which would be a great benefit all round.

### Resigns As Leader

Hon. T. C. Norris Retires From Leadership of Manitoba Liberal Association

Winnipeg.—Hon. T. C. Norris resigned as leader of the Liberal party in the province at the conference of the Manitoba Liberal Association today. Mr. Norris, who has been an outstanding figure in the public service of Manitoba for a quarter of a century, seven years of which he was premier, gave failing health as the reason for his retirement. The resignation will not go into effect until the annual provincial convention of the party this fall.

### Prorogue Quebec House

Quebec.—The third session of the fifteenth legislature of Quebec was prorogued by Lieutenant-Governor Narcisse Perreault. The session opened on January 7.

### Last Week In The Alberta Legislation

Healthy Financial Condition of the Province Is Shown In Budget Speech

Edmonton.—The shortest budget debate on record concluded on Monday evening, the proceedings being confined to one day, excepting the budget speech by the provincial treasurer, Hon. R. G. Reid, made on Thursday. Two opposition and four government members spoke.

In presenting the budget, which called for an estimated expenditure of \$11,677,862.33, and revenue of \$11,699,852.39, leaving a surplus of \$21,989.16, Mr. Reid commented on the healthy financial condition of the province. The proportion of all local taxation including provincial and municipal, to production was 7.7 per cent, the lowest of any province west of Quebec.

Reviewing the situation during the five-year tenure of the Farmer Government, Mr. Reid said that they had been able to effect big economies, controllable expenditure having been reduced \$1,179,394.57.

J. C. Bowen, opposition leader, criticized the administration of the government, stating that greater economies should be effected. The other speakers in the debate were W. T. Henry, Liberal, Edmonton; Hon. Geo. Hoadley, minister of agriculture; W. N. Shields; H. E. A. Macleod; Russell Love, U.F.A.; Wainwright; and Donald Cameron, U.F.A., Inverness. A number of others had intended to speak, but the debate collapsed on account of the Liberals not having their speaker ready.

Several hours debate took place on the new Factory Act, which provides for a general fifty-four-hour week in factories, workshops, stores, etc., with power given to the lieutenant-governor-in-council after January 1st, 1927, to declare for a forty-eight hour week. It was stated during the debate that eighty per cent. of the organized industries of the province were already on an eight-hour basis.

The act was given second reading, but the government will introduce some amendments during the committee stage to meet representations made.

During the week a number of bills were advanced to the committee stage.

### Will Protect Soviet Delegates

Russian Representatives Invited To Disarmament Talk In Geneva

Geneva.—The text of a letter embodying a final appeal to Soviet Russia from the League of Nations council to participate in the disarmament studies in Geneva has been made public. It shows that the council upholds the attitude of the Swiss Government that Moscow should not expect different treatment from that accorded to the representatives of the other countries invited.

The letter emphasizes that Switzerland has promised every measure of protection for the Soviet delegates, thus seeking to remove fears that Geneva might be the scene of incidents similar to that in Lausanne in 1922 when Vorovsky was assassinated.

### May Be Governor-General

London. Lord Cromer is going to Canada next July. It is learned on the highest authority, in connection with the governor-generalship.

## Tendency Of Canadians To Lean Toward Isolation Policy Of United States

### Kept Lighthouse Lamp Going

Fourteen-Year-Old Girl Was Alone For Three Nights on Isle of Wight

London.—The light in St. Helen's lighthouse, near Cambridge, on the Isle of Wight, was kept flashing for three nights by the 14-year-old daughter of the lighthouse keeper, Langton. The girl was marooned there without food, except one loaf of bread and a small piece of cake, but nevertheless she carried out her father's duties valiantly.

Langton and his wife rowed ashore in a rough sea to fetch food and oil to the lighthouse, says The Daily Mail. While they were ashore the sea rose in its fury, and notwithstanding several attempts made in a lifeboat and motor boat the father and mother were unable to return to the beacon.

Aside from an anxiety for his daughter left alone in the lighthouse with scarcely any food, Langton worried as to whether she would realize the necessity to light the lamp, which is one of the most important ones along the coast. Great was his relief when the light beamed punctually, and remained flashing throughout the night.

As the flash worked regularly while Mr. and Mrs. Langton were ashore, it was evident that the girl kept awake at night and wound every hour the clockwork apparatus which turned the light.

### Prepare Italians For Emigration To Canada

Premier Mussolini Advises Sending Southerners To Northern Italy

London.—Premier Mussolini, of Italy, proposes transferring Southern Italians to Northern Italy, where they can be acclimatized preparatory to emigrating to Canada and establishing what he calls "emigration centres."

This purpose was recorded by Senator Dandurand, of Montreal, in an interview with the British United Press. Senator Dandurand said he recently saw a letter from Mussolini to Miss

St. Laurent, who went to Canada to see if it would be possible to establish an Italian township. She found, he said, that Canadians everywhere said, "Don't send Southern Italians, send northerners. For this reason Mussolini has started this way out of the difficulty and is seriously working out his scheme for preparing his countrymen for life in Canada."

Senator Dandurand said, "Something audacious like this is needed to overcome the unemployment problem in England. Agricultural training centres should be created in England for preparing emigrants for their life in Canada."

### Gifts For King and Prince

Santa Clara, Cal. Two Angora goat skins destined to be a present to King George of England and the Prince of Wales, are on exhibition here. The skins were selected by the Prince on his Alberta ranch and have been undergoing a dyeing and tanning process here. They will be shipped to England next week.

### Removing Nelson's Statue

Dublin.—Nelson's statue, 125 feet high, which was erected in Sackville Street in 1808, is to be removed because it is a hindrance to traffic. As far as is known it will not be set up again.

Vancouver. "There is a tendency among some Canadians to avoid participation in world affairs, a tendency which I regret," declared Sir Henry Lunn, of London, one of the British empire's foremost advocates of world peace and Christian unity, in an interview here.

Sir Henry stated that he had noticed this tendency during his tour of the Dominion, and expressed the hope that Canadians would not follow the attitude of the United States. "The attitude of isolation is one that I do not approve of," he declared.

While firmly believing in the League of Nations and convinced that the United States "will not continue to disfranchise itself therein," Sir Henry said the present constitution of the league is faulty.

"The little nations have too much to say in the assembly and the big ones too much in the council," was his summary of the constitutional defect.

### Egg Regulations Remain Unchanged

Department of Agriculture Announces Decision Regarding Buying and Selling

Ottawa.—It has been decided not to introduce any changes this year respecting the present regulations governing the buying and selling of eggs, the department of agriculture has announced. The question of modifying the existing regulations, it was stated, has been under consideration by different organizations in the trade as well as the department. It was found impossible, however, to come to any agreement on regulations that were likely to prove satisfactory to all parties concerned. In the circumstances it was thought advisable to give those interested a little more time to become accustomed to handling eggs under fairly close supervision before introducing any further modifications, or doing anything to increase the responsibilities of the produce men interested in the trade.

Updates and may be given to the new

### Home Secretary Will Not Free Communists

Refuses to Release Twelve Jailed Under Mutiny Act

London.—Sir William Johnson-Licks, home secretary, flatly refuses to accede to the plea of the Socialist members of parliament for the release from prison of the 12 Communists who were convicted and sentenced November 25, 1925, on charges of "conspiring to publish and utter seditious and libellous words conspiring to incite persons to violate the Incitement to Mutiny Act of 1917, and conspiring to seduce persons serving in His Majesty's forces."

The home secretary, in refusing to set the imprisoned Communists at liberty, states that they are "serving terms in prison, not for expressions of opinion, but for conspiracy in incitement to mutiny."

Accident In German Mine

Berlin.—A coal mine cage containing 35 miners, plunged to the bottom of a shaft near Oberhausen, according to a dispatch received from Essen. Fifteen of the miners were killed and 20 injured. The rope from which the cage was suspended snapped during the changing of shifts.

## Government Plans To Fill Up Vacant Lands Adjacent To Railways

Ottawa.—A government scheme for making loans to settlers on crown lands was closely discussed in the house. Debate first turned on the resolution preceding the bill. Hon. Chas. Stewart, minister of interior, in sponsoring the resolution, indicated that the purpose of the scheme was to encourage settlement along the railways.

The resolution was adopted and the bill given first reading.

The resolution, sponsored by Hon. Charles Stewart, acting minister of immigration, proposes that the government should advance to settlers on crown lands, who are Canadian citizens, loans up to \$1,000, to other settlers, not coming within that definition, loans up to \$500.

The total sum which the government would be authorized to pay

out to any particular year would be limited to \$5,000,000.

Hon. Charles Stewart, minister of the interior, stated that there was still a considerable area of crown lands in the prairie provinces within an area of 15 miles from the railways. One of the objects of the legislation was to encourage settlers to take up these lands, clear them and cultivate them. "What we ought to try to do is to consolidate settlement along the existing lines of railway," said Mr. Stewart.

The minister pointed out that if settlement was pushed back far from the existing lines of railway, settlers were working under a certain amount of hardship and later came a demand for railway extensions. It was desirable to save the Dominion and Provincial Governments the cost of opening up new territory.

Sir Henry Walford Davies

World-famous exponent of the educational and national value of music, who will be a delegate to the third triennial conference of the National Council of Education to be held in Montreal, April 5-9. Sir Henry is a pioneer in community singing and has composed a number of well-known choral works for English musical festivals, among them being the music for "Everyman," originally produced at Leeds and frequently repeated.

## Aviation Still In Infancy

Aeroplane Not Yet Accepted Seriously As Means of Transportation

Remarkable as has been the progress made in the art of aviation, the general public, apparently, is as determined as ever to follow Mr. Asquith's famous advice to "wait and see." A writer in the Sydney, New South Wales, Bulletin, points out that the reception accorded to the aeroplane has been very different from that extended to the automobile. While the motor-driven car was almost instantly accepted as filling a realized want, the motor-driven plane, though it has accomplished wonders, has had no definite insurable effect on the life of the world at large. Were every plane destroyed, few people or none, except, possibly, members of the navy or army air services, would be appreciably disturbed. On the other hand, the disappearance of the automobile, the motor truck and the motor cycle would leave a void in the social and economic order and disrupt habits that, though far from ancient, are firmly established.

The truth is that after twenty-five years since air travel was first made possible, aviation is still properly styled an "infant art." The public has not yet accepted the aeroplane seriously, and the volume of transportation carried, whether passengers or freight, is negligible when contrasted with the older methods. When an automobile engine stops, one steps out on terra firma and says things according to his temperament and early education. But when an aeroplane's engine stops—well, one may reach the solid earth safely, but more usually will come down with a crash. Enthusiastic aviators will demur at this description, and frankly produce figures showing vast distances flown without accident. But when few days pass without recording the deaths of aviators, the public will continue to hesitate before following Tom Bowling aloft.

## Not Keen On Shakespeare

For Enjoyable Evening King George Prefers 'The Mikado' to Hamlet

The most widely read member of the Royal Family is, without doubt, Princess Marie Louise. She is also a very acute critic of current literature. I remember once hearing Sir

Sidney Lee say that Her Highness had tripped him up over a quotation, which proves that she knows her Shakespeare pretty thoroughly. And when someone asked her what she considered an ideal bedtime book, she instantly replied, in the words of Macaulay: "Shakespeare first and the rest nowhere."

But Shakespeare has not always been popular with royalty. Queen Victoria only tolerated him because the Consort said he was England's eldest possession. King Edward would sometimes see his plays on state occasions, but seldom remained awake after the second act. And King George, though he likes "Julius Caesar," and a few of the comedies, once remarked: "I am not ashamed to confess that for an enjoyable evening I prefer 'The Mikado' to Hamlet."—London Mail.

## Believed Record For North American Port

Two Passengers a Minute Handled in Halifax Recently

What is believed to be a record for any Canadian or United States port in the handling of trans-Atlantic passengers was made Feb. 28 at Halifax when the local immigration officials passed 1,245 passengers at the rate of 2.4 per minute.

These passengers arrived at Halifax aboard the Cunarder Ascania from Southampton, the Red Star liner Zealand from Antwerp, and the Cunarder Alcantara from Liverpool.

In the cargo discharged was a shipment of 6,610 boxes of Australian butter, destined for points as far west as Winnipeg, and nearly 2,000,000 pounds of tea.

## Find Skull 9,000 Years Old

The skull of the oldest Scandinavian has been unearthed at Rø, in the Swedish province of Bohuslan.

According to Dr. H. Hagg, of the Stockholm Museum, and Professor C. M. Ekstr, it is the only known human skull of the Ancyllus period, 9,000 years ago when the Baltic was a fresh water lake, and Southern Sweden, with the Danish Islands, were joined up with continental Europe.

## Blooms Also in Daytime

The night-blooming cereus, one of the most beautiful flowers of the desert, is not wholly a flower of the night, as has commonly been thought. Photographs on display show these rare plants being visited by bees that fly in the daytime.

## Pigmy Forest In Rockies

Dwarf Willow Trees Perfectly Formed Live Only One Season

In the birthplace of the clouds, on the summit of Saddleback, in the Rockies, are forests of the smallest tree in the world. You may crush a whole woodland in your tread or pluck a cluster so that a grove lies in your hand.

The dwarf trees are willows, and so rare that learned botanists travel far to find them. The famous professor who showed me the elfin things assured me that here, in a world of glaciers and everlasting snows, a forest of the sally order was growing at my feet.

None but the botanist could know that the cool green carpet is made of trees. I had thought I stood on clumps of some Alpine rock plant, or a kind of moss indigenous to the mountains of British Columbia.

Imagine a tree perfect in form and true to type and yet so tiny that it would be overshadowed by a violet, with its bole no thicker than a primrose stem, and leaves no longer than the petals of a daisy.

The growing days of this smallest tree are but a brief summer's span—a summer that has in it the chill of winter after the setting of the sun. In the hours when the sky is blue the bee draws nectar from a banquet of nectar.

The student who has come from far to Lake Louise and climbed the trail to the fairy forests, leaves them with regret and wonder in his heart.

## Title Proposed By Disraeli

Suggested "Duke of Canada" For One Of Queen Victoria's Sons

Letters written by Queen Victoria and recently published, reveal the fact that it was at one time proposed by Disraeli, when he was premier, to endow one of the Queen's sons with the title Duke of Canada and that she saw no objection to the proposal "provided it might be of use."

Students of Canadian history may recall that at the time of Confederation Canada was referred to as a "kingdom" in the Canadian draft of the bill, but the word "kingdom" was changed to "dominion" at the instance of Lord Derby, who was then British foreign minister, and who feared that the word "kingdom" would "wound the sensibilities of the Yankees."

Apparently neither Disraeli nor Queen Victoria had any fear of offending Yankee sensibilities by creating a Duke of Canada.—Woodstock Sentinel-Review.

## New Fashion In Faces

Present Generation Seems to Favor Long Thin Type

The human face is growing longer and narrower, says Miss Vivian George, chief assistant to Sir Arthur Keith, famous anthropologist. Miss George thinks it may be because eating is no longer the physical effort that it was in primitive days and less muscle is required in the jaw.

A very interesting theory, but probably not the right one. Human beings talk more and exercise their jaws in other ways to make up for the difference in mastication. The real cause is an aesthetic one. Men and women naturally favor faces of graceful lines in either sex. They have been choosing their mates for centuries partly on account of their faces. That is a law of selection. The trend of taste is toward the streamline in faces.—Border Cities Star.

## A Two-Ton Wrist Watch

Benjamin Lazarus, president of the Benrus Watch Company, sailed from New York on the France to supervise the construction in Europe of a wrist watch that will weigh two tons. The ornament, he said, is to be placed on the wrist of a statue that will be erected in a seaport town. Mr. Lazarus recently attracted public notice in his offer to place such a watch on the wrist of the Statue of Liberty. When the government frowned on this he found a sculptor who was building a huge beacon and who agreed to have the watch placed on his work.

## The Asbestos Industry

The asbestos industry, as a whole, has had a good year, and to a great extent has recovered from the unsatisfactory conditions which prevailed throughout the previous years. The total production for 1925 was 274,525 tons, valued at \$8,982,507, as compared with 208,762 tons, valued at \$6,561,659 in 1924. In point of tonnage, last year's output was a record and in value it is the third highest.

## Where Drinking Basins Help

Horat's Dairyman says that a Wisconsin farmer found, after he had installed drinking basins in his cow stable that his cattle never once went off their feed. When cows on the same farm were watered but once a day considerable trouble was experienced from cows getting out of condition.

## Economic Value Of Wild Life

A National Asset of Inestimable Value To People Of Canada

In addition to fur-bearing animals, so conspicuously identified with the earlier history of Canadian commerce, the Dominion is splendidly endowed with other wild life which, though not commercialized in the same sense or degree, forms a national asset of inestimable value, rays the natural resources intelligence service of the department of the interior. Canada possesses a wealth of game species, as well as of the bird life indispensable to agriculture and horticulture. The moose-hunting grounds of Eastern Canada, the bear and mountain sheep of British Columbia, game animals, birds and shrikes in unusual variety, have given the Dominion exceptional natural advantages in its means of recreation for the hunter and the angler.

Each day brings in letters from other countries inquiring as to where the fishing and camping is best, which roads lead most quickly to the lake and mountain districts. Others wish to have canoe trips outlined for them; "we want to get away from the beaten track," said one man writing from Pennsylvania. Even many Canadians are for the first time becoming interested in the beauty spots of their own Canadian woods and lakes.

The economic value of wild life, and of the magnificent scenic resources which each year attract visitors from abroad in great numbers, are being given practical recognition by the federal and provincial governments. In no respect has the administration of Canada's natural resources been more wisely exercised than in the liberal provision made for the creation and maintenance of a system of national and provincial parks and game preserves. While these areas, covering many thousands of square miles, indirectly yield a generous return upon the public monies invested, they represent a factor in national well-being which cannot be fully measured or appraised by monetary standards.

## Winter Pig Production

A load of fall fattened pigs, less than six months old, was marketed recently from the University of Alberta, at Edmonton. These were Tamworth-Yorkshire cross, raised on self feeders and graded \$5 per cent. select. This is further evidence of the fact that select hogs can be matured fully as early as other types, and also points to the possibility of winter pig production.

## The Greater Insect

It has been figured out that more timber suitable for lumber is destroyed every year by insects than by forest fires. Not counting, that is, the insect whose carelessness starts the fires.—Detroit Free Press.

## FAMED EXPLORER MAKES TRIP THROUGH CANADA

Capt. Roald Amundsen, famous as the discoverer of the South Pole and renowned Arctic explorer, climbed into the cab to get "shot" with Engineer Miller by newspaper cameramen during his short stop a few days ago at the Canadian National station in Winnipeg, enroute to New York to sail for Europe.

Although it was his first visit to Canada, Capt. Amundsen was unable to make any lengthy stops on his trip

## Channel Islands Have Separate Government

Is Quite Separate From Government Of Great Britain

Persons who believe that the Channel Islands, of Jersey, Guernsey, Alderney and Sark "belong" to England or are part of England may be surprised at the negotiations that have been carried on between the authorities in those islands and in the Isle of Man, on the one hand, and the British treasury on the other hand for three years. In 1923, the British home secretary invited the islands to contribute to the funds of Great Britain whose inhabitants were paying heavy taxation in consequence of the war.

The attitude of the Islanders towards the recommendations has not yet been revealed. The Isle of Man is governed by a lieutenant-governor, a council and an elective "House of Keys." The Channel Islands were part of the Duchy of Normandy before William, Duke of Normandy, conquered England in 1066. Thus, they became attached to England, but they have had governments distinct from the government of Great Britain. Jersey and Guernsey are each administered according to their own laws by a military governor and a "maillist," appointed by the crown and have their own "states" or parliaments. They have not for many centuries made any contributions to the British treasury, and probably would not have been asked to make any but for the burden imposed upon the United Kingdom by the war.

## Placing the Blame

Modern Homo Life Contributes to Youthful Delinquencies Says Charles Booth

"I have faith in the children of today," Charles Brandon Booth, grandson of the founder of the Salvation Army, said during a visit to Toronto. "They are keener mentally," he said, "but because of post-war conditions they are subjected to temptations which we never knew."

The absence of home influences is the chief factor contributing to youthful delinquencies, Mr. Booth said. "I cannot speak for Canada, but in the United States there is practically no home life. The home is just a place to eat and sleep."

## Horses in Western Canada

The province of Saskatchewan owns approximately one-third of the horses in Canada, having 1,400,000 in a total of 3,554,041. Alberta comes next with 819,325, while Ontario is third with 644,128. Manitoba has 358,839, so that the three western provinces have altogether 2,847,730 head of horses, almost two-thirds the total number in Canada. Saskatchewan has an average of about eight horses per farm.

The hard part is to love your neighbor if he has a better car than yours.

## Jack Miner As A Horticulturist

Has One of the Largest Out-of-Doors Flower Gardens in Canada (By Orville H. Dodge)

It is true that Jack Miner's fame as a bird-lover has spread abroad, attracting as it has thousands of birds and people to his bird sanctuary. But there is one branch of his work which has only been touched on by a few, namely, his investigation of tree and plant growths.

One newspaper recently termed him the "Luther Burbank of Canada," to which comparison, he, with his modest smile, remarked: "That was going it a little too strong."

As one approaches his residence, it is easily observed that the front of his property, which is one hundred and twenty rods in length, is planted with flowers of many varieties, some of which have been brought and planted by him, others sent to him from unseen friends all over the continent.

When I asked him why he planted these besides the public highway, I was told: "There are so many automobiles passing that, rather than off the roads to keep down the dust, I beautify the side of the road with such fragrant and beautiful flowers that every intelligent person who admires beauty at all will slow down in order to see them. As a result, they raise no dust."

While Jack Miner's property consists of but thirty acres, only three of these are occupied by the ponds of water. The balance is reforested and planted with flowers and shrubs, on the growth of which the naturalist has done considerable experimental work.

Among the trees planted on the sanctuary, there are thirty-five thousand Scotch pines, which, being evergreens, provide shelter and protection for the quail and the insectivorous birds in the winter. Thousands of red cedar trees have been planted, which produce a little blue berry containing seeds that furnish excellent food for such birds as grosbeaks and cedar waxwings.

Botanists and professors from a great number of the colleges and universities on the continent have visited Jack Miner's home and it has been often said that he has one of the largest out-of-doors flower gardens in Canada.

## Prince Is Practical Farmer

Ranch Is Not Merely A Hobby Says Professor Carlyle

Some of the facts given out by Professor W. L. Carlyle, manager of the Prince of Wales' R.P. ranch in Alberta, may be of interest to any who think that His Royal Highness' farming efforts are merely a hobby. Professor Carlyle stated that, with overhead charges cut to a minimum, there is an annual profit from the workings of the ranch, part of which profits each year are invested in improvements. Occupying 4,320 acres of rapidly developing farming country at the foothills of the Rockies, it contains 200 pure-bred Shorthorns, 240 pure-bred Shropshire and Hampshire sheep, and 75 thoroughbred horses. On an average 25 young pure-bred bulls are sold each year, at prices ranging between \$300 and \$1,500 each. The total value of the ranch, buildings and stock is now figured at more than \$200,000. Moreover, Professor Carlyle declares that the Prince of Wales himself is a practical farmer, and is not content merely to sit around while others do the work.

## Do We Sleep Too Much

The Harder a Man Works the Less Sleep He Requires

Psychologists have proven that the harder a man works the less sleep he requires, and that if one goes without sleep three nights in succession he will feel more tired on the second night than on the third, all of which leads to the belief that we sleep too much. During a recent test nine people of each sex went without sleep for eighty hours. At the end of that time it was found that eight to ten hours' sleep was sufficient to restore them to normal. Exercise and moderate eating helped the subjects of the experiment to keep awake. They swam, ran, drove motor cars and played games. After forty-five hours of wakefulness it was found very difficult to drive a motor car, but on the third night drowsiness almost completely disappeared, and driving became comparatively easy. Although physical strength declines as the result of any serious loss of sleep, mental alertness is in no way dulled.

## New Pension Rating

Affecting about 560 returned men, a new rating has been placed in effect by the board of pensions commissioners, it is announced, whereby all men who have suffered amputations to either arm up to the elbow will have their pensions raised from 70 per cent of the total disability pension of \$900 per annum, to 75 per cent, which will allow them about \$675 instead of \$630.

## Is Essentially A Farm Product

Binder Twine Is Manufactured From Fibre of Plants

How many Canadians know that Canada uses for an average crop approximately one hundred million pounds of binder twine? Counting six hundred feet to the pound, this is equal to sixty billion feet of binder twine, or ten million miles—enough to go around the world about four hundred times.

How many Canadians know that the raw material entering into binder twine is essentially an agricultural product? How many Canadians have seen any of the plants from which binder twine is produced, or any of their near relatives?

The fibre from which binder twine is manufactured, is obtained mainly from two sources—first, from the Sisal plant; and second, from the Manila plant.

The well-known "Century plant," to be found in the conservatories of Canada, is one of the numerous members of the family of plants, far from its tropical home, from which Sisal fibre is produced. In Yucatan, one of its native homes, it is known as henequen.

The fibre is exported to factories in different parts of the world, and the best equipped plants have developed machinery that is automatic, as far as is humanly possible, thus reducing manual labor to the minimum. The manufacturer, in buying raw materials, must have long experience and be a keen judge, if he wishes his product to stand up and retain favor with the farmer from year to year.

It is fitting that as one of the great consumers of binder twine in the world, Canada should have developed the largest plant for the manufacture of binder twine in the British empire. It is further a striking fact that this development has taken place without tariff protection, and in open competition with the whole world.

## Must Perform All Duties

King's Youngest Son Takes Turn in Standing Watch

Prince George, the King's youngest son, who has been promoted to the rank of lieutenant in the navy, will have to take his turn in standing watches, including the cheerless watch from midnight until 4 o'clock in the morning.

Young Lieutenant Windsor is stationed on the battleship *Hulk* of the fleet in the Far East.

King George, who went through the mill of naval service, insists that his sons in the army and navy shall take their turns in the duties of their rank.

Prince Henry, the King's third son who recently passed examination for promotion in his regiment, the Tenth Royal Hussars, will shortly receive his captaincy in the army.

It is understood he will then be appointed to the staff of either the Viceroy of India or of his uncle, the Earl of Athlone, Governor-General of South Africa.

## Sprout Seed Potatoes

Time Gained By This Method Is From Ten Days to Two Weeks

Many market gardeners and home gardeners sprout the seed potatoes before cutting into sets. This is done by exposing the tubers to the light for two or more weeks before the date of planting. Place eye end up in greenhouse flats or shallow boxes or even spread out on the barn floor, where the temperature is favorable to growth, and the light is good. Green sprouts will soon start and grow at a rate in keeping with the warmth and light of the location. It is desirable that these should be thick, plump and sturdy, and attain a length of not more than one half-inch by planting day. Long sprouts are weak and break off too easily. Careful handling is required in planting. The time gained on the marketable crop is from 10 days to two weeks.

## Canadian Salmon For Ireland

A shipment of Sebago or landlocked salmon was recently made by the federal fish culture branch to the department of fisheries, Dublin, Ireland, with a view to establishing this famous game fish in the lakes on the estate of Sir Thomas G. Grafton-Esmonde. A consignment of trout eggs was also made from Vancouver at the same time to the Tokyo Angling Club, Japan.

## Farmers Buy Savings Certificates

The return of prosperous conditions to the agricultural industry is evidenced by the fact that during 1925 farmers in Alberta broke all records in purchasing provincial savings certificates, the previous high mark having been established in 1920. For the year 1925, the total investments in the savings certificates was \$2,137,464, as compared with sales of \$1,166,740 in 1920 and \$891,582 in 1924.

## CHAPTER I.—Continued

New doubts, new spectres took their place in the parade that marched heavily across the shop girl's brain. The creditors, those inexpressible little people who fatten on the meagerness of the shop girl's purse with exorbitant prices for flimsy things dug in their prongs and faded away. They were now of the yesterday. For the first time—the first time that she could remember, Joanna, waiting to be dismissed for some unknown offence against some unknown customer, thought of tomorrow as it loomed within her own outlook. Dismissed from one store, the others would be, for a time, barred to her. And she had struggled long to attain the splendour of salaried of the higher grades. Had she been more accessible morally she would have been more prosperous.

But Joanna stopped short of a great many things; a stopping short too many people, classing her as one of a genus—the ultra modern genius—would not have credited her with.

She counted frantically and estimated herself one week of idleness without being too deep in trouble. Of course if the worst came to the worst she could pawn the fur wrap. Cohen wouldn't know.

But Joanna didn't want to pawn that coat. At any of the dancing places to which the boys took her it would be missed immediately. Other girls are observant of such things, and really a fur wrap is necessary mark of caste nowadays. None of the boys would be coming around for her if she showed up any place with her old and unfurrowed coat. None, that is, except John.

John! She quarrelled with him only last night—again! She told him he was entirely too muggy to keep up the pace with her. Somehow the thought of John, with whom a quarrel was never worth a second thought, since none lasted from one evening to the next, comforted her. She looked suddenly at the Old Man's quiet, unimpressive secretary. She smiled a little inwardly with the thought that she, the secretary, would be about the sort of girl John pretended to want her to be.

Fancy the glorious Joanna with the shimmering gold brown hair and the flash of scarlet across a field of velvet plinks like that! She almost laughed when the other girl in re-

sponse to the purr of a buzzer nodded at her and said:

"That's Mr. Graydon. He'll see you now. Won't you go in?"

The vision of John and the silly spectacle of herself trying to be like the quiet, softly self-effacing secretary just to please him, had cleared Joanna's brain of the immensity of tragedy. Her head was up and so was her heart when she went through the door and stood in "the presence."

She expected to face the living image of sinister cartoons she'd seen. When she realized that the elderly, rather portly gray haired man who stood behind a great mahogany table to receive her was "The Old Man" and that he was actually smiling across to her she wrinkled her brow. Then a great light came into her mind.

So THAT was it! She might have known! She was alert, shrewd, cunning, all at once. She braced herself for the fencing. The fur wrap could go hang. There'd be no difference between the owner, who could summon her, and "Mr. Good Morning," who had to come to her counter with his fawning.

"Did you send for me? I'm from the silks—No. 27." Her tone was a challenge.

The Old Man pointed to a chair. "Won't you sit down?" he asked pleasantly. "Twenty-seven stands for Joanna, doesn't it?"

She answered alertly. "Joanna Manners." She wondered how long it would take him to show his hand. Her resentment grew more bitter—each minute. More and more she was convinced that there was only one, and a commonplace motive, for the genial reception of a salesgirl, and a pretty one such as she knew she was, by the wealthy, powerful owner of the store.

The man across the table settled himself in his chair and fixed her. A curious expression played about his gray eyes.

"Ah, yes," he murmured, "Joanna Manners. I understood that was your name. Would you mind, Joanna, telling me where—and how—you live?"

Joanna narrowed her lids. "I live alone, and not in a palace, either. And the rest of it is, I'm satisfied."

Her employer seemed not to notice the irritation. "Then you don't live at home? Not with your family?"

"I haven't any family," she answered him, still fixing her words. As an afterthought she added, "But I can take care of myself as well as a family could, and I do."

The elderly man smiled at this. "He began to recognize the symptoms. 'I am sure of that, my dear,' he said softly. 'So let's speak of your friends. What kind—I mean have you many?'"

She had caught that "what kind." She stiffened in her chair and looked him full in the face. She was embittered anew by that curious expression under his gray eyebrows. "I haven't any friends particularly, besides a bunch of boys who are as light in the head as they are on their feet, but if I want any more I'll pick them out for myself."

Graydon darted a quick look at her. He was silent for a minute, toying with a jade paperweight. When he spoke he had resolved evidently to shorten his approach to whatever it was he had to say to the salesgirl from the silk counter who was not disposed to be humble in his presence.

"I must say that you impress me," he said, as if voicing a profound conclusion, as one who would not hesitate to dismiss friends if they were not invited. Again he was silent, Joanna fumed that he was preparing a new method of attack. She built new fortifications around her scruples and waited craftily.

Graydon was still patient. "You have read, I suppose," he said quite slowly, as if he wanted her mind to follow him, "of Cinderella and the Prince who put her foot into the golden slipper?"

"Yes," Joanna replied, "I've read about it—lots. But I'm off the prince stuff, and I put on my own slippers, thank you."

Then the Old Man laughed, laughed as some of his executives didn't know he could laugh. He dropped the jade paperweight and rose. Joanna rose with him, but he turned to a window and looked out into the skyscraper maze that opened here and there to release a glimpse of an ocean liner ploughing its way down the sapphire river toward the Narrows and the sea. When he turned back into the room Joanna stood by her chair watching him steadily. He went almost up to her, so close that she had to tilt her face to look up at him. What he spoke again there was a new note in his voice.

"We mustn't fence, Joanna," he said. "I didn't send for you with any idle pretense. I am to have the pleasure of delivering to you a message, a rather interesting message, I assure you. Something has happened to you, or for you, that so far as I know has never happened to any girl, at least so unexpectedly. First, I am to hand you this."

The sense of impending climax suddenly numbed Joanna's brain. The manner of Graydon had become portentous. She stared, fascinated, while he turned to his great desk.

When he stood over her again she took into her hands, wonderingly, a small, thin book which he silently held out to her. She looked up at him. He closed her fingers about the book and then lifted its cover for her. A folded letter dropped to the floor. Graydon recovered it and, opening it, gave it to her, motioning her to read it.

She saw her name, with the store given as her address.

When she had read the first typed paragraph Joanna, Joanna with the shimmering gold brown hair, clutched frantically as if with her hands to catch her wandering wits. One hand fluttered then to her throat. She swayed. Graydon caught her by the shoulders and guided her as she drooped into her chair.

(To be continued)

## The Secret Of Success

Concentrating on Work and Doing it Right Said Late Lord Northcliffe

The late Lord Northcliffe, the great British newspaper owner, in a certain interview concerning the secret of his great success, said, "Concentration is the secret. Too many men don't concentrate; they dabble here and there in a large number of different concerns or only one, and that is journalism; and the reason I have succeeded is because I devoted all my time to it."

"Work while you work, and play while you play," is an old adage. It means, no matter what you are doing, you should concentrate upon it and do it right. It means that while you work, you should work hard; and while you play, play hard. It means that while you are reading the newspapers, you should keep your mind strictly on your reading, so that you may derive benefit therefrom. If you are digging a ditch, dig with all your might until you are ready to give the next matter your whole attention. In this way you will make every five minutes of your time count, and you will be able to say, with Emerson, "Concentration is the secret of success in politics, in war, in trade, in short, in all the management of human affairs."

## Congo Evolutionists Eat Inferiors

New evolutionists have been found in the Congo. Nations known as the Batangi believe that apes are descended from disgraced men. "We are better and prouder than the apes, therefore we eat them," they told the Rev. H. C. Graham, a returned missionary.

"Give me a sentence with the word celery." "Every time he goes down celery takes a drink."

## Cuticura Loveliness A Priceless Heritage

For generations mothers have been using Cuticura Preparations for all toilet purposes and have been teaching their daughters that daily use of them produces clear, smooth skin and healthy hair. They find the Soap pure and cleansing, the Ointment soothing and healing, should any irritations arise, and the Talcum an ideal toilet powder.

Sample Each Free by Mail. Address: Canadian Depot, "Cuticura, Ltd., Montreal," Price, Soap 25c, Ointment 25c and 50c, Talcum 25c. Cuticura Shaving Stick 25c.

## Claims Stomach Souring Causes Bad Breath

New York City. Mr. Ben Lohelde, writes:—"I was formerly a victim of constant upset stomach, bad taste in the mouth and very disagreeable breath. My bowels were constantly constipated and nothing helped except temporarily. After using Carter's Little Liver Pills I have overcome all trouble and I am especially happy because of a sweet, clean, healthy breath."

Carter's Little Liver Pills are small, sugar coated, easy to take by every member of the family. Their action on the bowels is gentle. 25 & 50c red pkgs. Druggists.

## Luncheon Clubs Not New Idea

One Which Flourished In Addison's Days Had Quicker Rules

The modern luncheon clubs such as the Rotary, Kiwanis and Knights of the Round Table, do not typify a new idea, according to records. Luncheon clubs were well established in Addison's day when the "Spectator's Club" flourished under rules that include: "None shall be admitted into the club that is of the same trade with any member of it; if any member swears or curses, his neighbor may give him a kick on the shins, and if any member tells stories that are not true he shall forfeit for every third lie a half-penny."

## Nervousness, Dizzy Spells and Heart Trouble Relieved

Mrs. S. Wideman Used Dodd's Kidney Pills

Ontario Lady Has Had No Return of Her Troubles Since Taking Dodd's Kidney Pills Four Years Ago.

Newmarket, Ont.—(Special).—Once again Dodd's Kidney Pills have proved their inestimable value in the case of Mrs. S. Wideman, a well known resident of this place. She writes: "My back would pain me so at times I could hardly straighten myself. When I used to stoop down I would get dizzy spells. My husband told me to try Dodd's Kidney Pills. I used four boxes and can say I have not been bothered since." "What other things I have mentioned and that is over four years ago. I work every day."

That Mrs. Wideman's trouble came from the kidneys is evidenced by the relief she got from Dodd's Kidney Pills. When the kidneys become clogged or out of order, the circulation becomes sluggish, the impurities are not strained out of the blood and the result is weariness and lack of energy all over the body.

## Little Helps For This Week

He leadeth me.—Ps. xxiii, 2.

Through many a thorny path He leads My tired feet, Through many a path of tears I go; But it is sweet To know that He is close to me, My God, my Guide; He leadeth me, and so I walk Quite Satisfied.

Like Alpine climbers, our only safety is in steadfastly fixing our gaze on Him, our Guide, and following step by step the path He trod, that He might know all the dangers and difficulties that beset our way. And we may be sure He will never lead us further or faster than we can safely follow.

—Rose Porter.

## Canada Is A Continent

Has Area 175,574 Square Miles Greater Than Europe

Canada is not a country, it is a continent. The continent of Europe, from the remotest peak of Norway to the lowest point of Spain; from its westernmost boundary—a line which includes the British Isles—to its eastern boundary—a line which includes the Sea of Azov—has an area of 3,579,000 square miles.

The area of the Dominion of Canada, exclusive of the territorial seas and the Canadian portion of the Great Lakes, counting the islands of the Gulf of St. Lawrence, but not its waters, is 3,745,574 square miles. The area of the Dominion of Canada, therefore, is 175,574 square miles greater than the area of Europe.

Europe is divided into 22 countries. Canada is one nation.

The true love of a country so vast as Canada must be greater than the love of any one of its provinces. We are nine. We are one.—London Free Press.

Minard's Liniment used by physicians

## Dog Showed Perseverance

Irish Setter Puppy Travelled Eight Months to Find Old Home

We have given many stories of wonderful feats by dogs. Here is another very remarkable case reported in an English newspaper.

A boy living outside Paris sent to a breeder of dogs in the north of France requesting him to send him an Irish Setter puppy.

The puppy was placed in a crate and sent by train to the Gare du Nord station, where it was received by its new master, removed from the crate, taken across Paris in a taxi, and put in another train guarded by its master.

On reaching its destination, a little village about fourteen kilometres on the other side of Paris, the dog was taken on a lead to its new home.

During the evening the dog was released for exercise in the garden, which was entirely enclosed.

When the time came for the dog to be shut up for the night, however, it was nowhere to be seen. Its master searched high and low, consulted the police, and was out half the night in vain. No trace of the truant could be found.

Eight months later came a letter from the breeder saying the dog had just arrived home! For all those months the poor creature had wandered about in search of its old home.

## Canada's New Inland Empire

Wonderful Opportunity In Peace River Country Says Sir Henry Thornton

Canada's newest inland empire is the title given to the Peace River country. Sir Henry Thornton says: "If only 50 per cent. of the acreage of the Peace River districts were brought under cultivation, more wheat would then be produced than is done at present by the whole of Canada. This country abounds in what the nations of the world want—poultry, cattle, sheep and grain. These are raised in abundance. Here we have another great empire in the west awaiting development, and an empire which will be rich in productivity in the time to come."

## Allies Allow Germany To Build Zeppelin

Airship Is Designed For Pleasure Trips and Commerce

It is reported from Friedrichshafen that the public subscription in Germany organized by Captain Bekker for the construction of a new Zeppelin has produced so far 2,300,000 marks out of a required total of four millions. Half a million was handed over to the company in order to begin building the airship immediately.

It is understood the allies consented to the construction as the Zeppelin is destined for pleasure trips and commerce.

## May Place Buffalo On Forest Reserve

Officials of the department of the Interior are considering the proposal to stock the government pine forest reserve in the Prince Albert district, Saskatchewan, with buffalo.

Science having discovered that white is gray, hope is renewed that the puzzle of why blackberries are red when they are green may yet be solved.

FOR NEURITIS

## Uses Bow And Arrow

Caraja Indian Shoots Fish Instead of Using Hook and Line

An explorer, who is gathering Indian material in South America, writes thus of the Caraja Indian.

"As a fisherman the Caraja Indian is in a class by himself. Instead of using hook and line, he shoots fish with the bow and arrow, a difficult feat which taxes to the utmost his skill with that weapon and also his ability to handle a canoe. Their canoes are dugouts, made by burning out the insides of trees, and are sometimes more than thirty feet long. In these they will follow a prize fish for hours, manoeuvring the boat to a position which will enable them to get a likely shot. Many of the fish are beautifully marked and colored, so it is no trouble to trail them up or down the river. When the Indian has made a lucky shot, he unhesitatingly dives into the water and captures his fish—often nearly as big as he is."

## HEALTHY CHILDREN ALWAYS SLEEP WELL

If Baby Does Not Enjoy Refreshing Sleep He Is Far From Well

The healthy child sleeps well and during its waking hours is never cross but always happy and laughing. It is only the sickly child that is cross and peevish. Mothers, if your children do not sleep well; if they are cross and cry a great deal, give them Baby's Own Tablets and they will soon be well and happy again.

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels, sweeten the stomach, banish constipation, colic and indigestion and promote healthful sleep. They are absolutely guaranteed free from opiates and may be given to the newborn babe with perfect safety.

You can obtain Baby's Own Tablets through any medicine dealer at 25 cents a box, or by mail, post paid, from The Dr. Williams Medicine Co., Brockville, Ont.

## Mexico's New Agricultural Law

A new agricultural law has been officially published in Mexico. It provides for the establishment of a national agricultural bank, and requires all land owners to register their property in a bureau which is to be established. Agrarian debt bonds may be used as security for land loans at the new bank.

"Father, what is politeness?" "Politeness, my son, is the art of concealing from other people what you think of them."

## RUN-DOWN AFTER BIRTH OF BABY

Ottawa Woman Made Strong by Taking Lydia E. Pinkham's Vegetable Compound

Ottawa, Ontario.—"I was terribly run-down after the birth of my third baby. I had awful hearing-down pains and was afraid I had serious trouble. I was tired all the time and had no appetite. My sister-in-law is taking Lydia E. Pinkham's Vegetable Compound and cannot praise it too highly and asked me to try it. I have had splendid results and feel fine all the time now. Any one who needs a thorough pick-me-up soon learns from me what to take."—Mrs. REBE PARRIN, 320 Cumberland Street, Ottawa, Ontario.

## Terrible Backache

Hamilton, Ont.—"After my baby was born I had terrible backache and headaches. I could not do my work and felt tired from the first minute I got up. But worst of all were the pains in my sides when I moved about. I had to sit or lie down for a while afterwards. I could keep my house in order, but many things had to go undone at the time, because of my ailments. I was told by a neighbor to take Lydia E. Pinkham's Vegetable Compound, as she said it would build me up. I was relieved before I had taken the first few bottles and have not had any trouble like it since."—Mrs. P. MAUKLE, 115 Ferguson Avenue South, Hamilton, Ontario.

**New Water Pump**

Attention was drawn at the town council meeting last week to the fact that a number of dead animals had been left unburied at the nuisance ground. The direction of this unpleasant task was left to the health committee.

The works and property committee was instituted to build a new bridge on the Lethbridge road on the outskirts of town.

The council ordered the digging of a new well and the installation of a new pump. This well will be as large as both of the others combined. Work is now proceeding. When completed the new well should insure a plentiful supply of water in all parts of the town.

The problem of Broadway drainage was discussed. No solution was reached.

Work of cleaning town ditches will be proceeded with immediately.

Attention was drawn to a surplus of trees in Victoria Park. H. Kimball was instructed to remove those requiring these trees for transplanting should make application to Mr. Kimball.

Beet Growers Notice—Someone interested and with knowledge of beet growing, and possessing good beet land to enter into partnerships. Cash furnished. For further particulars apply to the Raymond Recorder, Phone 24.
